DETAILED ACTION

The rejections of the prior Office Action are withdrawn due to Applicant's submission of the Terminal Disclaimer and arguments.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 8-11, 18-19, and 21-39 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14 of U.S. Patent No. 6,828,014 to Branham et al. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims contain limitations to triggerable cationic copolymers, nonwoven fabrics, wet wipes, and language to various intended conditions. However, because Branham claims a fibrous substrate (nonwoven fabrics and wet wipes are obvious inclusions as the materials are the same) having the same quaternary ammonium groups such as shown in patented claim 5 (trimethylammonium chloride) and divalent metal ions (patented claims 12-14), the intentions and functions would be present.
